Maths - Alien Invasion

Aliens are landing in the city of Manford.
Follow the clues to work out where the aliens have landed.

Clues

1. You are playing by the lake when you spot something in the corner of your eye. It is a spaceship! 4 left is Queen's College. Who would marry the Queen? This person has a school not far away from the Queen's College. What are the co-ordinates of the this place as this is where the first spacecraft has landed.
2. A group of explorers have gone to the zoo to discover a new specie. North East of the zoo a lightning bolt struck and hit a large church like place. What is the name of this place and what are the co-ordinates of the second spaceship?
3. The firefighters are on their lunch break waiting for their next call out. A rumble can be heard to the west of the fire station. List all the possible places in which the spacecraft could land. What are their co-ordinates?
4. Your teacher is stranded on Victoria Way, you are at the Police Station. Direct your teacher from Victoria Way to the Police Station using the map. You can only use the orange streets to direct your way through the city. Example: Move south 4 spaces to Bridgewater Street.
